

CUSTOM CABINET CLEANING & MAINTENANCE TIPS

Mette's Advantage Custom Cabinets are finished with top of the line finishes to provide years of performance, durability, and beauty in this premium wood product. You will keep your wood cabinets looking as pristine as they did on day one with these helpful maintenance tips.

Basic Care

- Always dust with a polish-moistened or damp cloth, following the grains of the wood.
- As needed, remove residues such as smoke, cooking vapors, and body oils with a soft, lint free cloth and a mild detergent or soap and warm water. Dry after.
- Keep wood surfaces dry by wiping up spills, splatters, and water spots as soon as they occur. Dry surfaces immediately with a soft cloth.

Best Practices

- Avoid cleaning with a dishcloth or sponge, as it may contain remnants of grease or detergents. Never use scouring pads, steel wool, powdered cleaners, Murphy's Oil Soap, or Pine Sol.
- Do not use products containing bleach, ammonia, or abrasive additives and do not allow oven cleaners to come into contact with the wood.
- Avoid placing small appliances where heat is directed onto the wood surface.
- Minimize contact with liquids as excessive moisture exposure can cause permanent damage. Avoid draping damp cloths or dishtowels on the wood surface.
- Be careful around damage or breakage to finishes when using water.
